WATER IN THE CITY

Concept

We embark on a hot summer day with a group of Cool kids in L.A. in search of freshness.
Thanks to a first person POV camera, we feel like we're part of the gang.

Film

Los Angeles Summer 2023

The heat is overwhelming, the concrete is burning. We are following a group of friends wanders trough the city streets with lives in slow-motion.

The group's weariness does not prevent them from filming and recording this afternoon similar to the last ones.

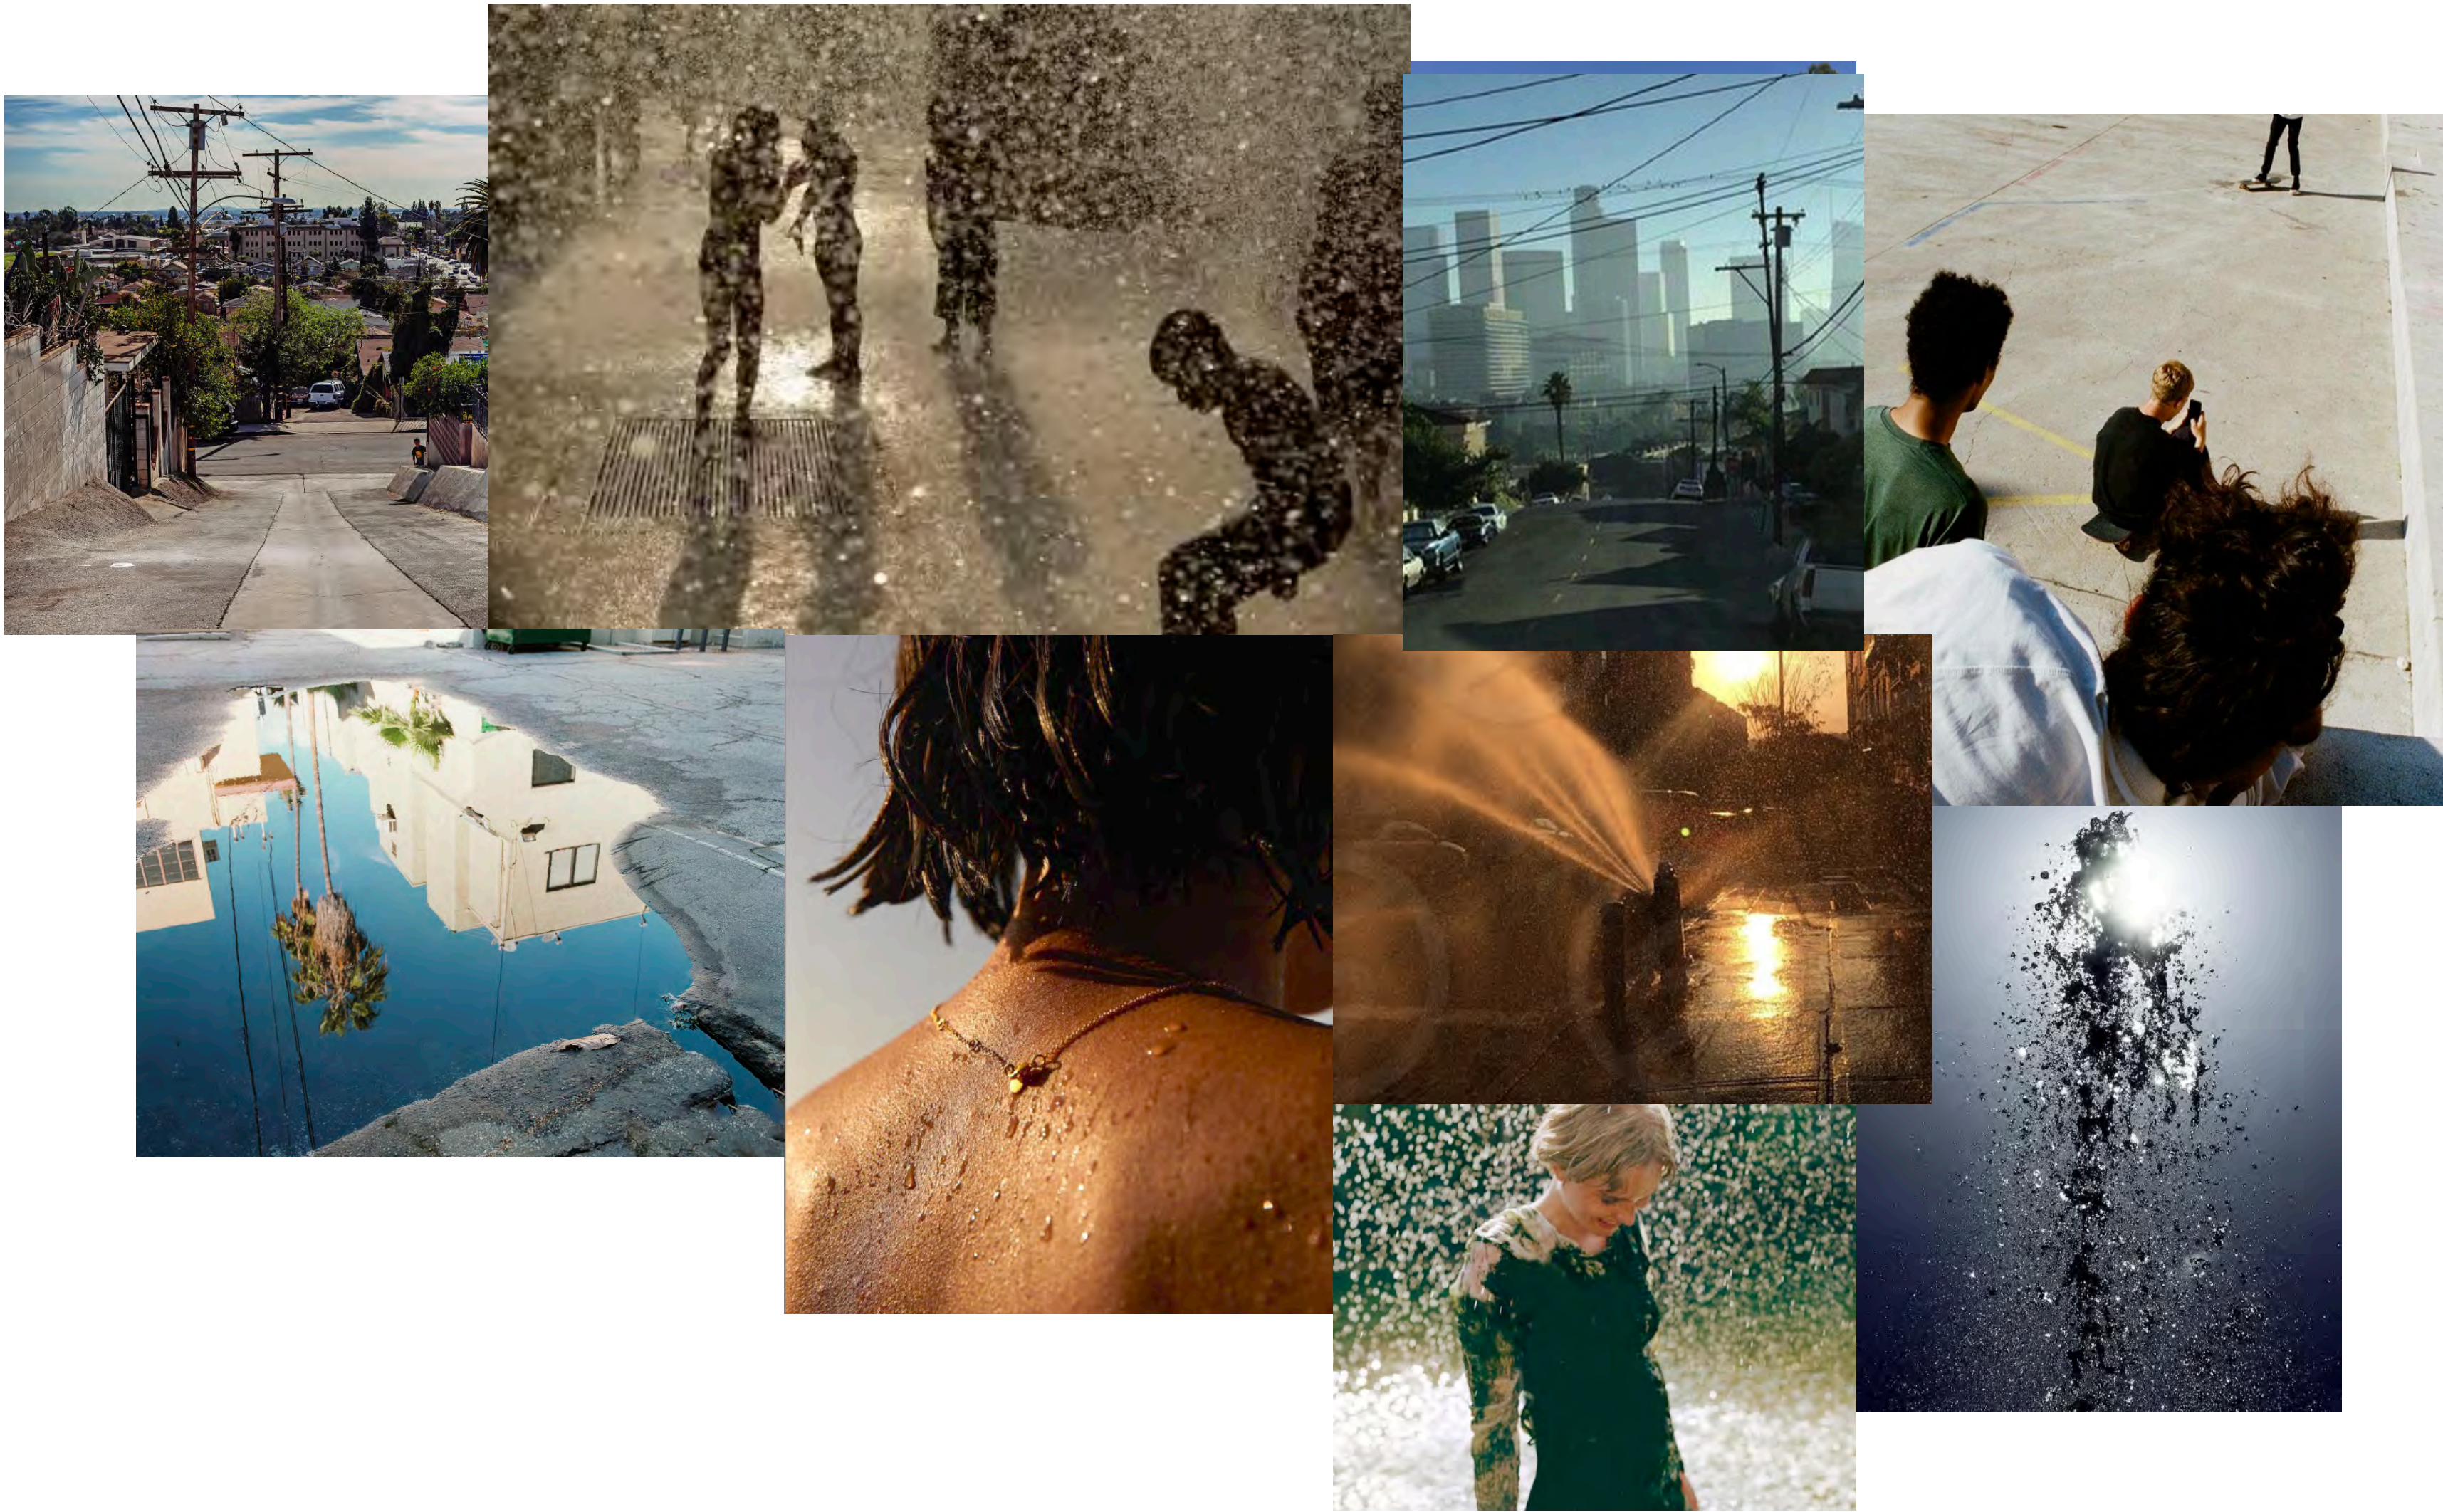

When suddenly, at the bend of a block, they come across an open fire hydrant.

The sidewalks are flooded. The city is reflected in the puddles.

All of these scenes are recorded by the group filming each other.

The filters are activated and accompanied by digital effects. They transform and intensify the moment and the memories.

LOCATION

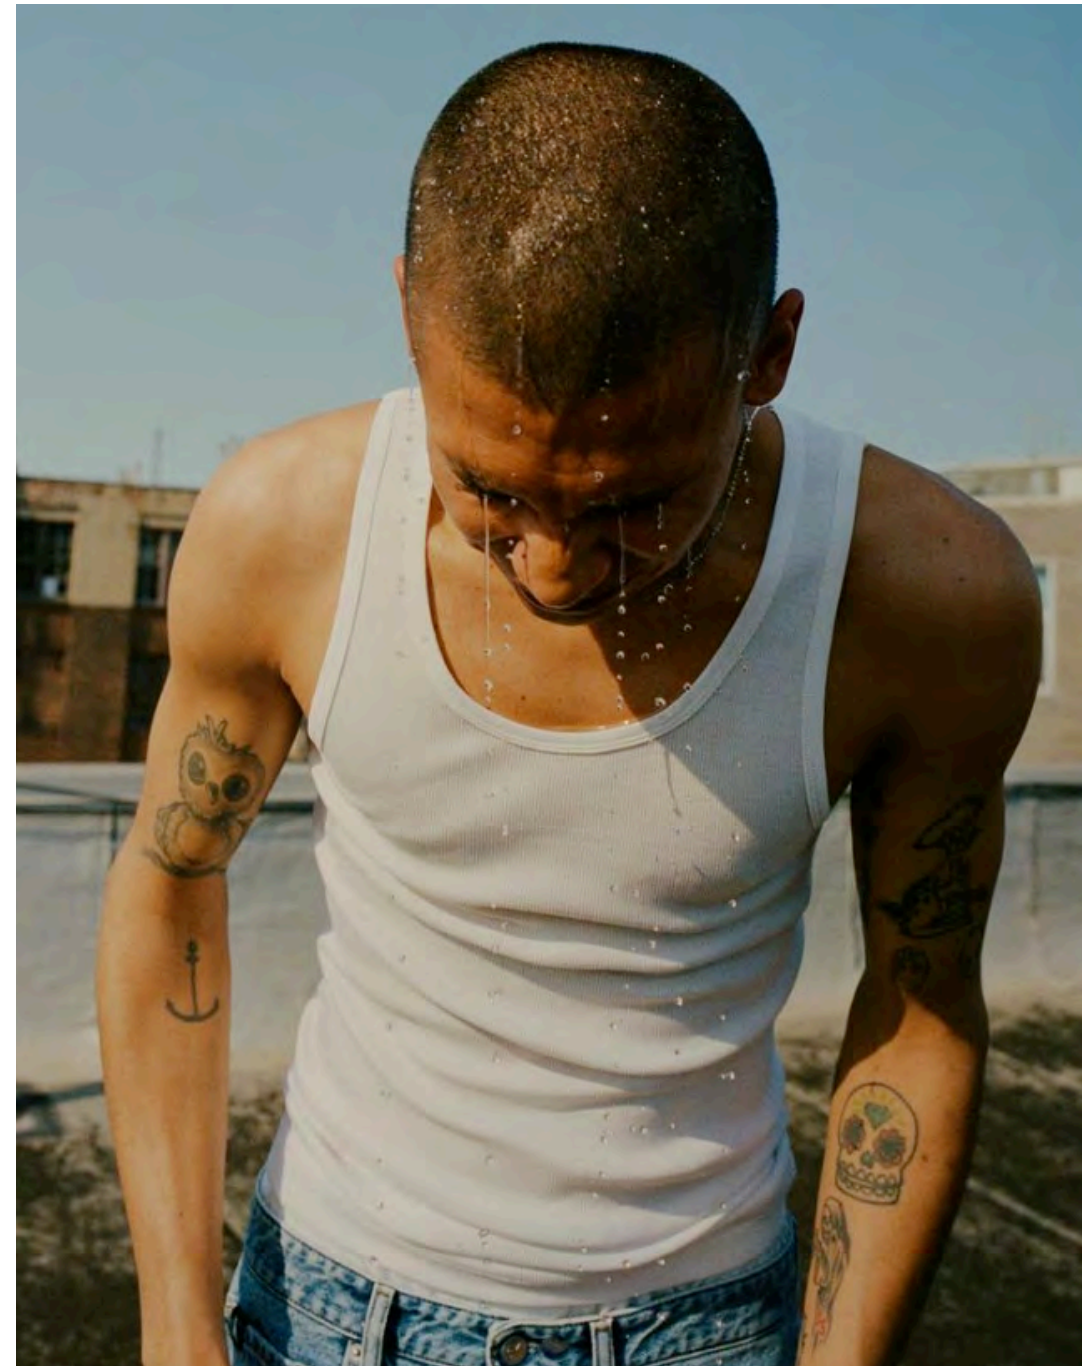

Typical city decor of the United States. The architecture should be low, one story buildings. The street should be wide enough to see the sky. Palm trees if possible. City markers are welcome: sidewalks, crosswalks, traffic lights and signs. Art Deco or overly Miami architecture is not desired.

Ck One reflections CASTING

18/27 years, various skin tones: African-American, Latinx, Indigenous, Asian, White... , Various gender expressions, Different body types, Real people, not models.

PERFECT MOMENT

Concept

It's a perfect moment.

A couple is alone in the sea, enjoying the last rays of sunshins.

Thanks to a first person POV camera, we feel like we're a part of this magic moment.

Film

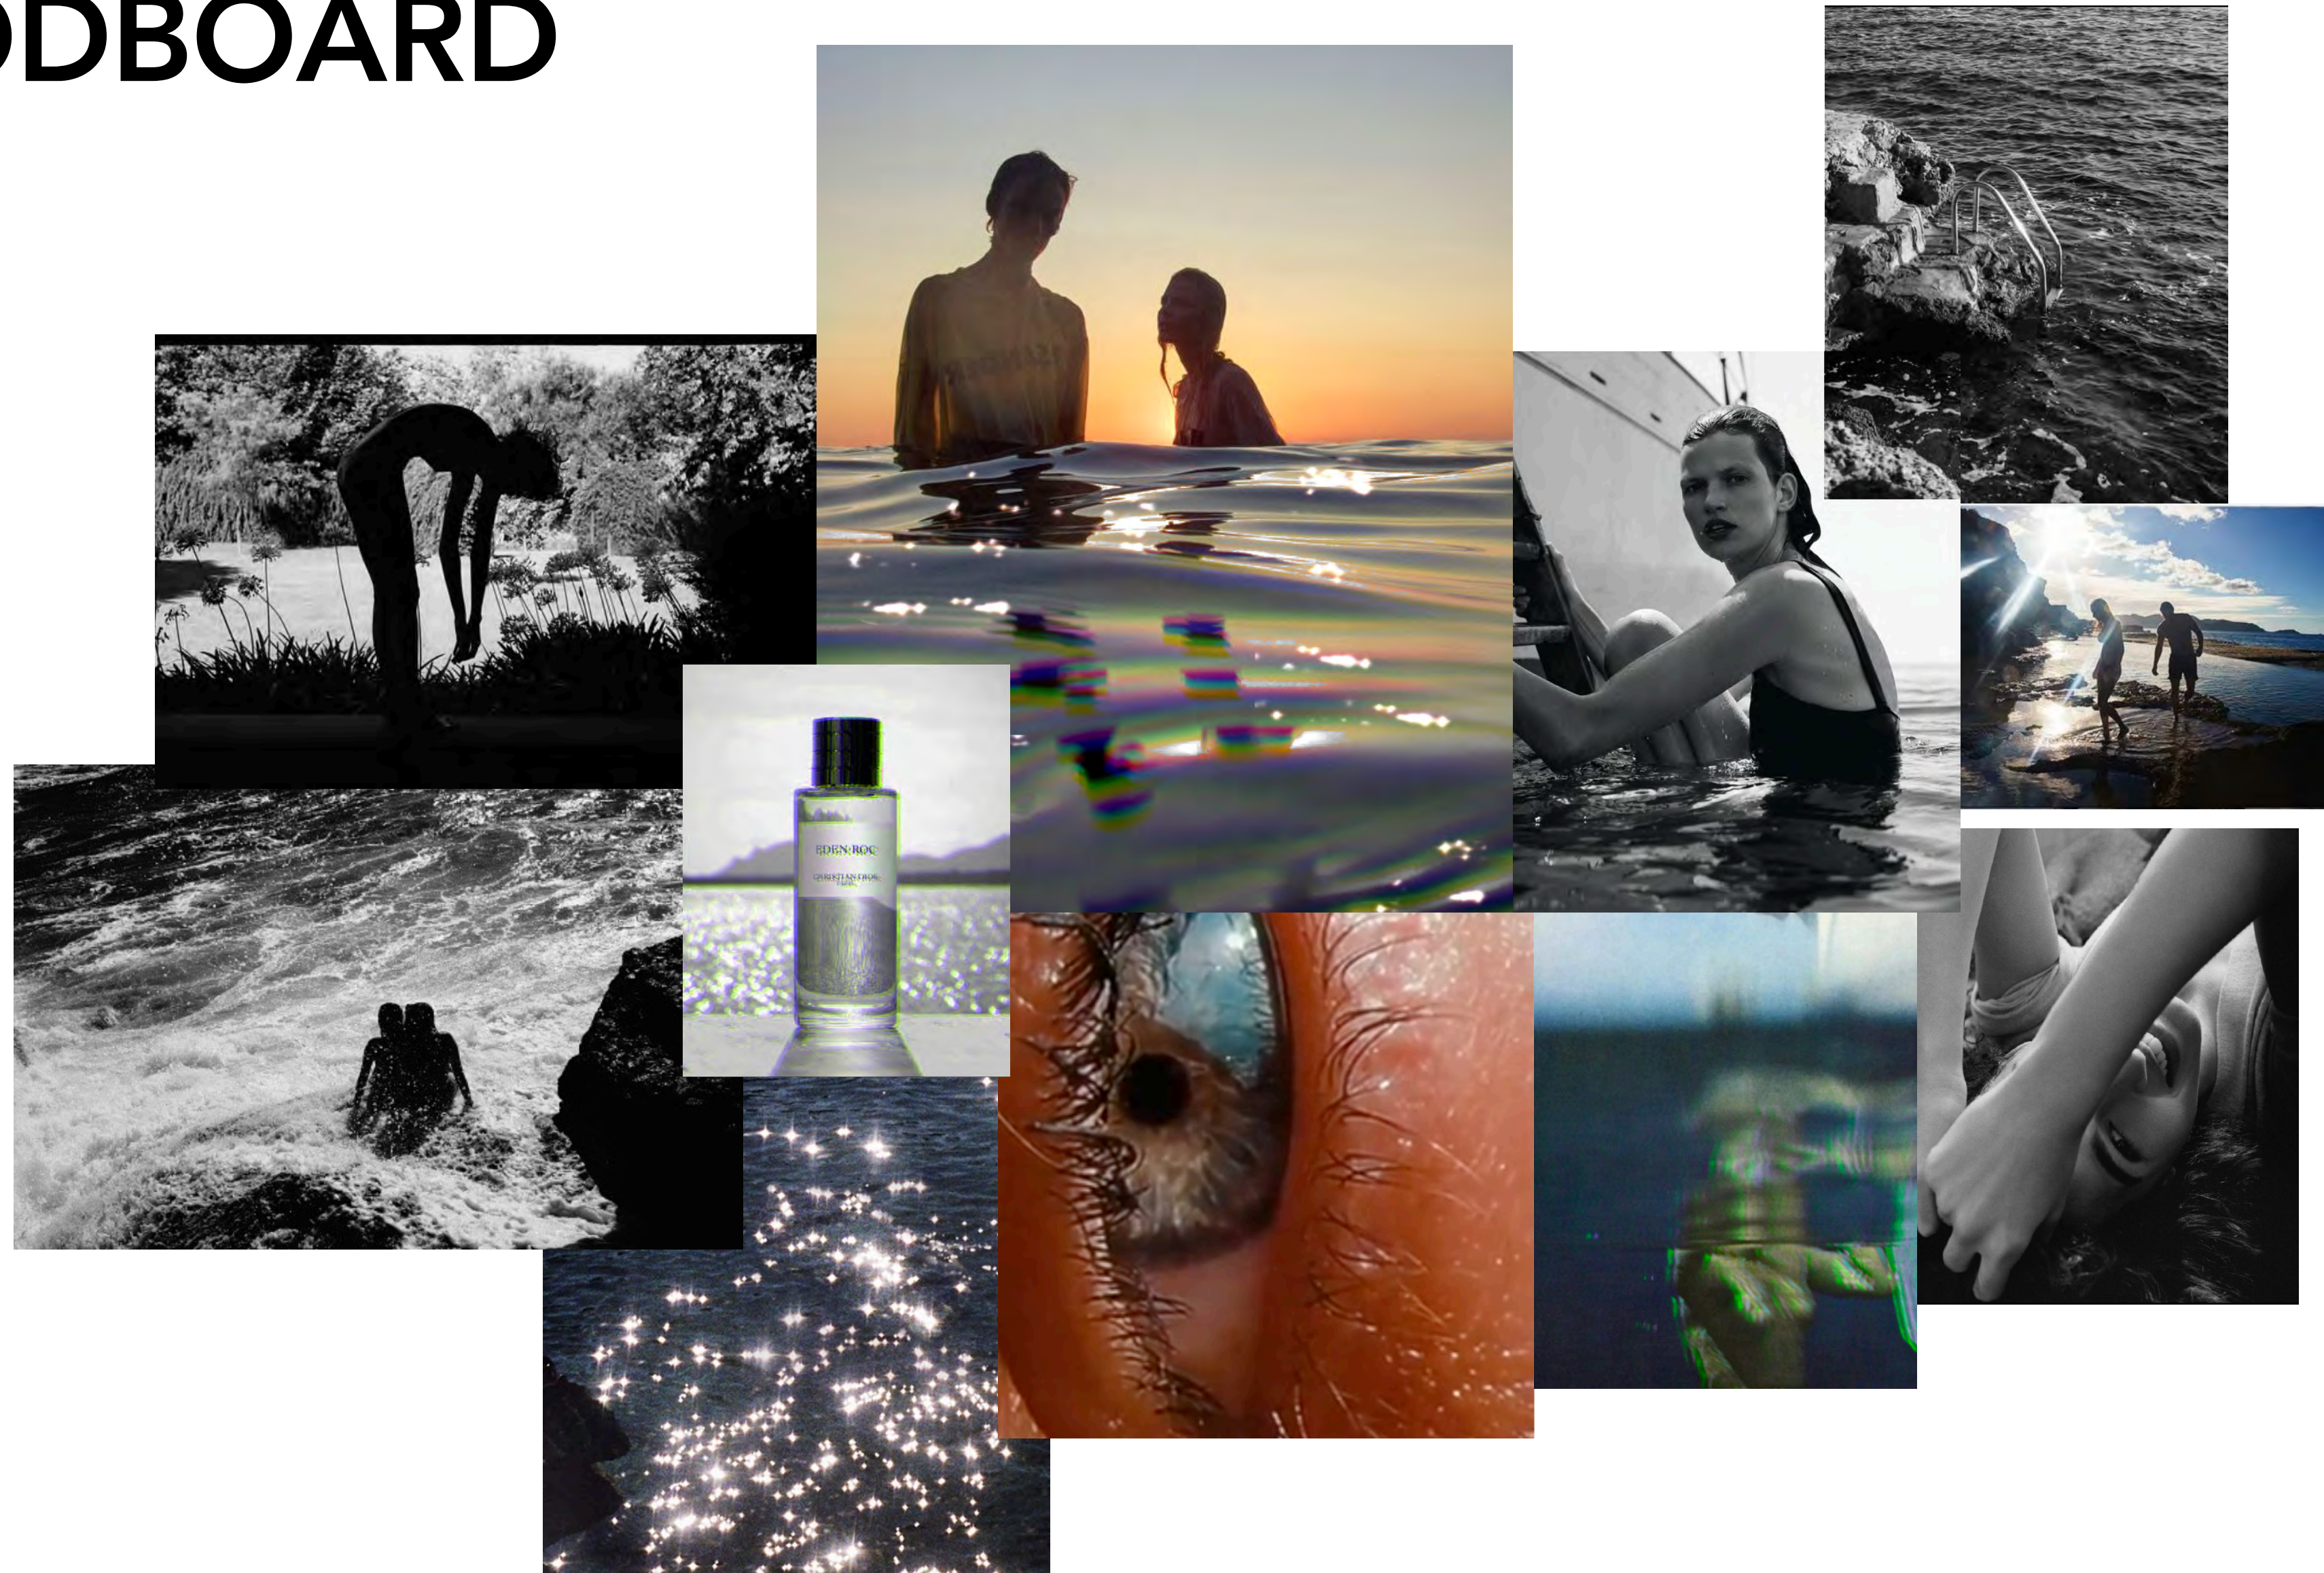

End of a summer day. Last rays of sunshine. The perfect moment.

A couple is enjoying the instant. They're alone. They're floating in the sea.

When they dive, the water gets blurred and colored (a filter?) to an electric and glittered green blue.
